- Operating weight may vary depending on the bracket design and the model of base machine
- The overall length is with standard chisel and bracket
- The noise level is the value when fitted with the box type vertical bracket.
- The specifications are subject to change without notice for improvement.
- Please ask your nearest dealer for special application such as underwater job.

FUJI FMB SERIES

Hydraulic breaker
with high reliability
and excellent
durability

FEATURES AND ADVANTAGES

- **Greater breaking performance**

the hydraulic power plus nitrogen gas driving system provides a greater breaking force than ever before

Sistem tenaga hidraulik ditambah dengan sistem penggerak gas nitrogen memberikan gaya penggeraman yang lebih besar dari sebelumnya

- **Long service life**

Special alloy steels, precise machining and advance heat treatment technology make the FUJI breakers exceptionally tough and durable

Paduan baja khusus, mesin yang tepat dan teknologi heat treatment yang lebih maju menjadikan Breaker FUJI sangat tangguh dan tahan lama.

- **Built in control valve design**

Built in control valve design is adapted to reduce the total number of parts and operating cost. (except FMB-135, 180 and larger models)

Built in Control valve desain disesuaikan untuk mengurangi jumlah parts dan biaya operasional, (kecuali FMB- 135, 180) dan model yang lebih besar.

- **Variable throttle mechanism**

This mechanism is equipped in Fuji breaker to generate the optimum impact force and speed according to the base machine conditions and work requirement.
(FMB-125 and larger models)

FUJI Breaker dilengkapi dengan Variable Throttle Mechanism yang berfungsi untuk menghasilkan gaya impact yang optimal dan kecepatan yang sesuai dengan kondisi dasar mesin dan kebutuhan kerja. (FMB - 125 dan model yang lebih besar).

- **Line up with 16 models**

There are 16 models from very compact to extra large models in FUJI hydraulic breakers to meet all the working conditions, needs and base machine.

Terdapat 16 model, mulai dari yang Compact sampai Extra Large Models untuk memenuhi kebutuhan dalam segala kondisi.

- **Reliable after-sales service**

All major components are guaranteed according to the warranty policy. Once FMB breaker is delivered, FUJI service team shall provide reliable and attentive after sales services throughout the service life of the breaker.

Semua komponen utama dijamin sesuai dengan kebijakan garansi, setelah FMB Breaker sudah dikirim after sales service Fuji akan memberikan service yang terbaik.

BRACKET TYPES

Various types of brackets are available in FUJI breakers to suit to all kinds of base machine.

Box type vertical bracket

Open type vertical bracket

Side type bracket

Backhoe loader bracket

CHISEL TYPES

Point chisel

For concrete pavement and rock bed breaking.

Flat chisel

For trenching and finishing slopes.

Flat-end chisel

For quarry use.

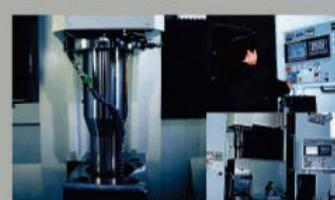

MANUFACTURING FACILITIES

CNC Turning center

CNC Machining center

High-precision grinding center

High-precision testing center

3 dimensional measuring machine
